THE
VAN DIEMEN'S LAND
POCKET
ALMANACK,

FOR THE YEAR OF OUR LORD
MDCCCXXIV,
BEING BISSEXTILE, OR LEAP YEAR;

AND THE
FIFTH OF THE REIGN OF HIS MOST
GRACIOUS MAJESTY,
KING GEORGE THE FOURTH.

PUBLISHED
UNDER THE SANCTION AND PATRONAGE OF
HIS HONOR THE LIEUTENANT GOVERNOR,
WILLIAM SORELL, ESQ.
&c. &c. &c.

HOBART TOWN:
COMPILED AND PRINTED BY ANDREW BENT,
Government Printer.

ADVERTISEMENT.

——*

THE COMPILER, in publishing the first Almanack that has been yet printed in Van Diemen's Land, conceives he may be allowed to claim the indulgent consideration of his Readers.

The difficulties in the first attempt of any new work are numerous; and it must be reasonably admitted that some must have been experienced in this. The Compiler has nevertheless taken every means to make it as perfect as possible, though he does not presume to flatter himself that it is entirely free from imperfections;—But, as this publication will in all probability appear before the Public next year with many improvements made in it from the suggestion of friends, whose correspondence has already been kindly promised, the Compiler trusts that the severity of criticism will be somewhat softened; and the more so, when it is considered that it has this year been unavoidably compiled and printed chiefly in those hours which he has been able to snatch from the perplex duties of a laborious profession.

It is however a pleasure for him to declare his obligations individually to each of the Gentlemen who have favored him with their assistance in the completion of the work.— And, without any desire of boasting, either in the collection or arrangement of the matter, yet in the typographical execution of it, the Compiler feels confident he may claim a superiority over every other little work hitherto issued from the Derwent Press; and in the Public liberality he has reason to hope it will meet with that approbation he has endeavoured to make it deserve. Should it however fail in meeting that from a FEW, it is hoped it will be found useful to MANY; and with that expectation the Compiler respectfully sends forth into the world, for 1824, the *Van Diemen's Land Almanack*.

Gazette Office, Hobart Town, Jan. 1, 1824.

COLONIAL GARDENING.

SEASONS.

SPRING.—September, October, and November.

SUMMER.—December, January, and February.

AUTUMN.—March, April, and May.

WINTER.—June, July and August.

Potatoes.

POTATOES are cultivated in this Island with unbounded success, particularly when the soil and season are both well chosen.—I would recommend that a garden crop of this useful vegetable should be put in about the 10th of September, if the ground should lay near the seaboard, or any way not subject to the frost; but by constant attention, the potatoe may be so protected by moulding, as to avoid this inconvenience. A field crop may be put in, with every prospect of success, from the beginning of October to the latter end of November, and even as late as the 10th of December; but the earlier sowings are found most generally the best.—Care should be ta-

ken that large perfect sets be selected for the earlier plantings; but it is remarked, that, in this climate, a much lesser quantity of seed will suffice for a general crop than in Europe.—A garden winter crop may be planted in January or February. The sets made choice of should be the produce of the last winter crop; and potatoes uncut must be preferred for the seed, as those cut are apt to perish in the ground from the rains, while those put in whole are almost sure to come up, and bring forth a good crop.—The produce of potatoes in this Island is very considerable; and there is scarcely a year but what brings a plentiful crop to the grower, who is thereby well paid for the planting.—New potatoes by the 1st of December.

Cabbages.

Cabbages will do well in almost any season, but for a summer crop the seed should be sown about the latter end of June or beginning of July—which will enable them to be transplanted about the 1st or middle of September.—It is recommendable, that some short well-rotted manure should be put in the drills, and covered lightly over with mould, and the plants dibbled in;—the hilling then as occasion may require; but for a winter crop, the seed should be sown about the latter end of January, which will enable them to be transplanted in the first week of March.

Cauliflowers.

In this country cauliflowers are planted in the months of August and September, and are brought to great perfection without that trouble and expense of using glasses, as is customary in England to shade them from the sun, frosts, and rains. A bed should nevertheless be prepared for them in a well sheltered part of the garden, where it lies well to the sun, with a free access to air, and in rich ground; taking care to select the stoutest plants, and to bury plenty of good horse dung regularly at the roots, digging the ground one spade deep.—In transplanting cauliflowers, put them thirty inches apart, or a yard distance each way; which, to make the best of the ground, will enable the gardener to sow, on the same piece, a crop of spinage and radishes, which will turn out to good account, without the least retarding the growth of the cauliflower plants; for by the time they begin to advance any thing considerably, the radishes and spinage will be all cleared off for use; but when this is intended, it is most eligible to sow the seed before the cauliflowers are planted—a week or fortnight, or more, if thought necessary.

Broccoli.

This esculent plant may be sown and treated exactly the same as cabbages.

Pease and Beans.

Pease and beans may be cultivated towards the seaboard in almost any season; but for a general crop, throughout the interior and places subject to frost, they should not be planted earlier than the 1st or middle of July; and it is recommendable, that the ground should be as strong as possible, and even that a little manure should be added.—Pease, in this Island, particularly beans, grow much less to stalk than in Europe, but are nevertheless very productive.—A later crop than what is here recommended may often prove good, but is nevertheless very uncertain, from an insect which is frequently known to destroy the blossom.

It might not be amiss to remark here, that as this country is given so much to weeds, the beans had better be set in one-row drills, which will render rubbish innocuous by moulding.—New pease in October.

Carrots and Parsnips.

Carrots and parsnips are best when sown in brush or made land, and should be put in early in the month of July. These vegetables grow to an extraordinary size in this Island, with almost an entire certainty of a crop.—The beds prepared for them should be thrown somewhat higher than in Europe, as it is observable that those sown in this way grow the largest.

Onions.

This climate and soil are particularly adapted for this highly useful vegetable, and they grow largest when sown where sheep have been folded; but are nevertheless to be raised to perfection in any ground which has been well worked and manured. They should be put in, in the last week of April, or beginning of May, as they will then have acquired a considerable growth before the winter frosts appear, and as the frosts set in sharp and unexpected in this country in the back end of summer, a later sowing will run great risk of being entirely destroyed from this cause; or, on the other hand, be stunted from having attained no considerable growth before the drought of the ensuing summer.—The potatoe onion is extremely productive in this Island, and requires to be planted out in the latter end of autumn.

Leeks.

Leeks are generally fit to transplant in the month of April,—putting them out in rows a foot apart, in beds about four feet broad.—In sowing leeks let the same rule be observed as for sowing onions.

Shallots.

Shallots may be planted after the same manner as leeks, either with a dibble or in drills drawn with a hoe.

Celery.

Celery seed should be sown so as to be sufficiently large to transplant in the month of January.

Radishes.

Radishes may be sown in almost any month of the year.

Lettuces.

Lettuces, which have stood the winter, should be put out in August or September; and planted in one spot of rich ground, a foot apart, giving a little water to them as soon as planted.

Horse Radish.

For this plant, which is propagated by cuttings of the root, choose as light and deep a soil as the garden affords; which trench regularly one good spade deep at least; letting the roots be about a foot asunder.

Turnips.

Turnips grow to an extraordinary size in this country, when the ground has been properly dressed for them. A winter crop is found most available; the ground being already prepared, care should be taken to sow the seed, if possible, in the month of January, provided there shall be any considerable wet; but if there should not, the sowing should be deferred till the ground be properly moistened. A summer crop is

hardly in soon, except for the table, and may be put in about the 1st or middle of July.

Artichoke.

This esculent plant does not grow very large here.—They are raised by sets or cuttings of the roots; preparing the sets and planting them as directed for potatoes. Let them be planted in rows a yard asunder, four or five inches deep, and eighteen inches or two feet distance in the rows.

Asparagus.

For a bed of this choice vegetable, which is grown here with much success, the ground should be prepared well in September, and richly manured with well rotted stable dung before sown. When the bed diminishes in strength, as will be the case in the course of years, a new bed should be set out, believing the old one to be worn out.—For digging or forking the bed, you should be provided with a proper fork, which ought to have three tines about nine inches long,—the tines to be perfectly flat, and about an inch broad, pretty thin, and the ends of them rounded and blunt. In forking the bed, care should be taken to well loosen it in every part to a moderate depth, but at the same time to be very cautious not to go deep so as to wound the crowns of the roots. This work of forking is most necessary to be done every spring, to improve and loosen the ground, and to give free liberty

for the buds to shoot up, as well as to give free access to the sun, air, and rains. In making plantations of these plants, one great article to be considered is, to make choice of proper soil, which must not be wet nor too strong or stubborn, but such as is moderately light and pliable, so as it will readily fall to pieces in digging or raking, and in a situation that enjoys the full sun.—Let the beds be well cleared and kept free from weeds, and this must be done by a very careful hand-weeding.

Cucumbers, Pumpkins, and Melons.

With a little care these plants may be grown in this country with much success.—They can be raised under glass in the spring, and in the open air in summer, either in hot-beds, or by the assistance of dung in open ground. Make the beds for forward crops in August, and prepare the ground for a later crop in September or beginning of October. The plants must be raised on a seed-bed, and then transplanted upon hot-beds, which should be made about three feet high, and secured from the frosts by a frame or other covering being laid over them at night.

As all kinds of vegetables pay uncommonly well the expense and labour of planting, it would be recommendable for the small settler, residing near Hobart Town, to give his particular attention to their culture; for too much time could not be bestowed to this occupation, as it would afford him a more certain means of supporting his family, by supplying the shipping and the town, than perhaps growing any thing else.

THE FRUIT GARDEN.

Currants & Gooseberries.

These trees grow extremely luxuriant, and are now introduced into every garden.

Raspberries.

This pleasant flavoured fruit is of certain produce, and in this country extremely brittle.—They should be planted in bunches, at least two yards apart, and the ground kept well hoed between them: manure is not necessary, although it is frequently and not improperly put to them.—The situation for these plants should be sheltered from the sun, and in a rich moist ground.

Strawberries.

Strawberries grow wonderfully to leaf in this country, and are not of certain produce; but the fruit is always very fine. The ground should be if possible of a light sandy barren nature, laying high, and care should be taken not to allow the tendrils of this plant to extend too far, as this is said, by experienced gardeners, to be an infallible preventative of their bearing. This plant seems somewhat whimsical in its produce, and is frequently known to bear only in odd seasons. The plants must be more frequently renewed than in Europe.

The Green Gage.

This remarkably luscious plum is now becom-

ing plentiful in the colony, and is this year very productive.

The English Cherry.

This fruit appears to be exceedingly well adapted for the climate; for cherries, of the Kentish sort, are now growing in several places, with an appearance truly delightful to the eye.

The Apple and the Peach.

These fruits are two of the most plentiful of any kind in the Island, and are now rapidly improving in quality.—The apple-tree in this country is so astonishingly fruitful, that instances have been known of very young trees having borne fruit the season immediately after they were grafted, before the grafts and stocks were well united, or that the clay and bandages could be taken off or loosened—a circumstance almost incredible to a European.

Pears.

This delicate eating fruit, although not yet very plentiful in the colony, is nevertheless productive in its growth.

Quinces.

The quince-tree bears abundance of fruit in this colony.

The Mulberry.

This highly flavoured fruit, after being properly pruned to keep it open in the heart, bears equally as much, if not more fruit than it does in England.—The black sort, intro-

duced into the colony, is the best for general culture.

Walnuts, filberts, and cob nuts have not yet borne.—The fig-tree bears much fruit; but as it does not ripen before autumn, the frosty mornings then set in, and cut off all this kind of fruit.

Grapes.

The produce of grapes in this country is astonishingly great, and they are exceedingly fine in quality; and this fruit will no doubt in the course of a few years be of considerable benefit to the colony, not only in making wines for our own consumption, but for exportation.

Vines against walls and in vineyards, being in the month of May desolated, or the leaves fallen, may have their winter pruning and nailing, &c. which business consists of a general regulation, both among the young and old wood.—In pruning vines, the general branches are to be left on in every part, with a proper supply of the last summer's shoots below and above, both in laterals and terminals, as principal bearers to produce the fruit next year; and let all the irregular and superabundant shoots be cut out close; cutting out also some part of the former year's bearers, on particular occasions, such as either were too close, or too much advanced in length in their respective places, &c. pruning them less or more down, either to some eligible lateral shoot to remain for a terminal or leader thereto, as every branch, whether remaining entire or shortened, should have a young shoot for a terminal, or occasionally some parts where too crowded cut quite out or pruned as above, as it may seem expedient; and likewise casual, long advanced, naked old wood, unfurnished with young, should be pruned similarly, in order to give proper room for training the more eligible branches and general supply of bearing shoots, &c.—For the last summer's shoots, which are now left, will, in the spring, produce from every eye or bud a young shoot, and on these young shoots the grapes are produced the same summer; for vines seldom produce immediate bearing shoots from any but one-year old wood.

Transplanting.

May and June are the proper months for removing fruit trees of all descriptions; as they will then carry fruit to a surprising degree, to what is found to be the case in other countries; but any time between the 1st of May and middle of September will ensure their growing.—Grafting is generally performed with best success in the last fortnight of September. It is particularly noted, that all the native shrubs of this country are difficult to transplant—requiring to be lifted with the ball—as well as being early in the winter; but Sir JOHN EVELYN'S maxim, although reversed in this country, will come in well here—"Plant trees at All-hallowmas, and command them to grow;—plant trees at Whitsuntide, and entreat them to grow."

Sweet-brier, English hawthorn, the broom, the furze, and in fact every other plant and shrub grows most luxuriant in this climate, perhaps more so than in any other part of the known world.—The English oak, and a great number of other favourite trees are also growing in many places here in the greatest luxuriance.—Among those lately introduced into the colony are—the sweet Spanish chesnut, as well the common horse chesnut, the beach, the ash, the fir, and the willow.

Gather Ripe Seeds.

Gather seeds in dry weather, of such plants as ripen, as lettuce, leeks, onions, cauliflowers, cabbages, &c. to prevent their being attacked from the rains or mildew.

Destroy Weeds.

Take advantage of a dry day for this work, as a person may then soon go over a great deal of ground with a sharp hoe. Every weed that is suffered to stand to scatter its seed upon the ground, lays the foundation of hundreds for the year to come; therefore every opportunity should be taken to destroy them before they arrive to that maturity. Never suffer large weeds to lay upon the ground, when they have been hoed down, but rake them up and burn them, which will enrich the land.

The French Economical Journal says, that the following is an infallible method of guarding cabbages from the depredation of caterpillars:—Sow a belt of hemp-seed round the borders of the ground where the cabbages are planted, and although the neighbourhood be infected with caterpillars, the space inclosed by the hemp will be perfectly free, and not one of these vermin will approach.

 CIVIL ESTABLISHMENT,

**THE NAMES AND BOUNDARIES
OF THE
SEVERAL DISTRICTS**

WITHIN THE

Counties of Buckinghamshire and Cornwall.

COUNTY OF BUCKINGHAMSHIRE.

Districts.

KINGBOROUGH.—Bounded on the N. by the south side of Brown's River, and a west line of 4½ miles; W. by a south line of 8 miles; S. by an east line to D'Entrecasteaux's Channel (Storm Bay Passage); and E. by D'Entrecasteaux's Channel, North-west Bay, and the River Derwent round to the mouth of Brown's River.

QUEENBOROUGH.—Bounded on the S. by Kingborough district; E. by the Derwent River, which includes all those grants commonly called the Sandy Bay Farms, and those on the north side of Brown's River; N. by Argyle district, which commences at the Sandy Bay Creek, and continues west towards Mount Wellington; and on the W. by the hills.

ARGYLE.—Bounded on the S. by Sandy Bay Creek, and continues W. to Mount Wellington; S. W. by Mount Wellington and the attached range; N. E. by the Derwent River, including Hobart Town, and all those farms situated and round about New Town to the rivulet at O'Brien's; N. W. by the rivulet to its source; and the S. W. by Mount Wellington ranges.

GLENARCHY.—Bounded on the S. E. by Argyle district; on the N. E. N. and N. W. sides by the Derwent River, round by the stream commonly known by the name of the First River, (now named by His Excellency the Governor in Chief, Sorell River) which includes all those farms at what is known by the Black Snake; S. W. by that river to its source; and on the S. by that part of Mount Wellington range.

- YORK.**—Bounded on the W. by the Derwent River and part of Ralph's Bay; S. and E. by North Bay round to Ralph's Bay Neck; and on the N. by the Neck, which includes that part commonly called the South Arm and Muddy Plains.
- CLARENCE PLAINS.**—Bounded on the N. W. by the north west side of Kangaroo Bay, the creek, and the road leading to the Pitt Water bluff; on the N. by the south side of Pitt Water to North Bay; S. and E. by North Bay, Ralph's Bay Neck, and Ralph's Bay to the Derwent; and on the W. and S. by the Derwent River to Kangaroo Bay.
- SUSSEX.**—Bounded on the N. W. and N. by the Iron Creek to its source; on the E. by a range of hills; on the S. by the Carlton River to its source; and on the W. and S. W. by North Bay, and part of Pitt Water to the Iron Creek.
- GLOUCESTER.**—Bounded on the E. and S. E. by the Iron Creek to its source, which is the north and north west boundary of Sussex district; S. by part of Pitt Water to Orielson Creek; S. W. by Orielson Creek, until lost in the range of hills; and N. by the hills.
- HARRINGTON.**—Bounded on the N. by the Pitt Water Road, commencing at the Coal River Bridge; E. by Orielson Creek to Pitt Water; and on the S. and S. W. by part of Pitt Water and the Coal River to the bridge over it, including what is commonly called Sweet Water.
- CALEDON.**—Bounded on the S. by the Pitt Water road, commencing at the Coal River Bridge to Orielson Creek; on the S. E. by Orielson Creek to its source, and a north line of 4 miles; on the N. by a west line to the junction of the Kangaroo River with the Coal River; and on the W. by the Coal River.
- STAFFA.**—Bounded on the South by Caledon district, commencing at the junction of the Kangaroo stream with the Coal River; E. by the range of hills connecting with what is called the Brown Mountain; N. by the large Lagoon at Jericho; and W. by the Coal River.

- ORMAIG.**—Bounded on the S. by the Ulva district, commencing at the junction of the Kangaroo stream with the Coal River, and running west 6 miles to a range of hills; W. by the range; N. by an east line to the Coal River; and E. by the Coal River.
- ULVA.**—Bounded on the N. by Ormaig district to a range of hills; W. by a north line of 7 miles, including what is commonly called the Tea-tree Brush; S. by an east line to the Coal River; and E. by the Coal River.
- CAMBRIDGE.**—Bounded on the N. by Ulva district; W. by part of Drummond district; S. W. by Forbes and Clarence Plain districts, to the road leading to Pitt Water Bluff; S. E. by the road; and N. E. by that part of Pitt Water near the Coal River entrance.
- FORBES.**—Bounded on the N. E. by Cambridge district; S. E. by a south west line from the Cambridge district to Geils' Town Bay; S. W. by the Derwent River to an inlet and creek in Herdsman's Cove; and N. by the creek.—This includes Mount Direction and the hill commonly called the Devil's Back.
- DRUMMOND.**—Bounded on the S. by Forbes district; E. by a range of hills leading to that part called the Tea-tree Brush; N. by a creek generally known by the Mint Swamp, (lately named by His Excellency Governor Macquarie, Strathallan Creek) to the Jordan River; and W. by the Jordan and Herdsman's Cove.—This description includes the township of Brighton.
- JARVIS.**—Bounded on the S. by Strathallan Creek (the north boundary of Drummond district); E. by the Bagdad range of hills; N. by a west line to Constitution Hill; and on the west side by a creek called the Bagdad Run to the Mint Swamp, or its junction with Strathallan Creek.
- STRANGFORD.**—Bounded on the N. E. by the Bagdad Run to the Mint Swamp (now named Strathallan Creek); S. by the Jordan River, until an east line will fall upon Constitution Hill; and N. by that east line.

MELVILLE.—Bounded on the N. by the River Jordan; E. by the same river and Herdsman's Cove to the Derwent River; S. as far up the Derwent as the First River (now named Sorell River); and W. by a north line to the Jordan, including what is commonly called Green Point.

NEW NORFOLK.—Bounded on the E. by the Melville district on the north side of the Derwent; and by Glenarchy district on the south side of the same river; N. by the Jordan River; W. by a north line commencing from the gully, where the new road is made over to Macquarie district, which is on the north side of the Derwent, and by the stream called the "Plenty" to its source, which is on the south side of the Derwent; and S. by a continuation of Mount Wellington range.—This description includes Elizabeth Town.

MACQUARIE.—Bounded on the E. by New Norfolk district, on both sides the Derwent; N. by a range of mountainous hills, connecting with Emu Valley; W. by the Clyde (commonly called the Fat Doe River) to the Derwent River, and a south line from the south side of it to a range of high mountains; and S. by the mountains.—This district includes the new township of Macquarie.

GREEN PONDS.—Bounded on the S. by Strangford and Melville districts; W. by a range of hills, dividing the Jordan River from the Clyde; N. by an east and west line running from Spring Hill; and E. by the hills laying between Port Dalrymple Road and the Coal River.

PITT.—Is generally known as Bruné Island.

SORELL.—Bounded on the E. by the River Clyde; S. by the Derwent to the Shannon; and N. by what is called the Blue Hill; also on the W. by the Shannon.

MURRAY.—Bounded on the S. by a range of high hills, west of Emu Valley; N. by the hills connecting with the Western Table Mountain; E. by the hills laying between the Rivers Clyde and Jordan; and W. by the Clyde River.

AMHERST.—Bounded on the E. by the Clyde River; S.

by the Blue Hill to the Shannon; W. by the Shannon stream; and N. by the hills connecting with the Western Table Mountain, bearing east and west.

BATH.—Bounded on the S. by the north termination of the Green Ponds district, which is Spring Hill, comprising all that tract to the lagoon at Jericho; E. so far as the dividing range from the coast; and W. to the Western Table Mountain.—This description includes the township of Oatlands.

METHVEN.—Bounded on the S. by the north termination of the Bath district, which is Macquarie Springs, extending over all that country northward to Antill's Ponds; E. so far as the dividing range from the coast; and W. to the connecting hills with the Western Table Mountain.

LENNOX.—Bounded on the S. by the north termination of Methven district, and northward to Macquarie River, which is the north extreme, extending eastward to the source of that river, and the dividing range from the coast; and W. by the Western Hills.

COUNTY OF CORNWALL.

Districts.

RICHMOND.—Bounded on the S. by the Macquarie River, and N. by Elizabeth River from their junction to their sources; and E. by the dividing range from the coast.

BATHURST.—Bounded on the S. by Elizabeth River, and Macquarie River to its junction with the Lake River; W. by the Lake River to its connection with the South Esk River; N. by the South Esk River, until a south line cuts the ridge of hills dividing it from Elizabeth River; and E. by that ridge of hills.—This description includes Campbell Town, Perth, and Bathurst Plains.

LAKE RIVER.—Bounded on the E. by the Lake River to the Western Mountains; on the S. and W. by those mountains; and on the N. by an east line to the Lake River at the upper end of Norfolk Plains.

NORFOLK PLAINS.—Bounded on the N. E. by a north west line of 5 miles from opposite the township of Perth, and a west line to the Lake River; on the W. by a south line to the Lake River district; and on the S. and S. E. by the districts of Lake River and Bathurst.—This includes all the settlement called Norfolk Plains.

BREADALBANE.—Bounded on the S. W. by Norfolk Plains district; on the N. by a north east line to the North Esk River, and afterwards by the North Esk to the range of Ben Lomond; S. E. by a south west line to the South Esk, opposite Mr. Gibson's house, and afterwards by the South Esk to Perth Town.—This district includes part of Patterson's Plains and Camden's Valley.

MORVEN.—Bounded on the N. W. by Breadalbane district; N. by the range of Ben Lomond, and an east line to the South Esk; and on the other sides by the South Esk River.—In this district is the stream called the Nile, and the first and second creeks from Ben Lomond.

WESTERN RIVER.—Bounded on the E. by Norfolk Plains; N. E. by a north west line of 7 miles from a bend on the South Esk, where the river bears to the north east; N. W. by the range of hills on the north side of the Western River; W. by a south line to the Western Mountains, beyond the first Western Creek; and on the S. by an east line to Norfolk Plains.—This district includes the Pennyroyal Swamp and Quamby's.

LAUNCESTON.—Bounded on the S. by Breadalbane district to the South Esk River; S. W. by the Western River district; N. W. by a north east line to a range of hills from Ben Lomond till it joins the North Esk River, and afterwards by the North Esk, which is the boundary of Breadalbane.—This goes about 10 miles down the Tamar, and includes the town of Launceston, and the lower end of Patterson's Plains.

GEORGE TOWN.—This district includes both sides of the Tamar where George Town stands, down to the sea coast, at the entrance of Port Dalrymple, and extends up the Tamar, towards Launceston.

SUCCESSION

OF THE

LIEUTENANT GOVERNORS

OF

VAN DIEMEN'S LAND.

—ooo—

I. **LIEUTENANT GOVERNOR DAVID COLLINS** arrived from England with the first fleet, and established the Colony at Hobart Town on the 16th of February, 1804, after the arrival in the month of August, in the preceding year (1803), of Captain Bowen, in His Majesty's Colonial Brig Lady Nelson, with a small party of soldiers and prisoners on board from Port Jackson; who were disembarked at Restdown.—He died during the Administration of his Government, in the Island, on the 24th March, 1810; having administered the Affairs of the Colony 6 years and 31 days.

After the death of Colonel COLLINS, till the beginning of 1813, the Government of the Colony was *pro tempore* administered by three Commandants in succession; viz. Lieutenant EDWARD LORD, Royal Marines; Captain MURRAY, 73d Regiment; and Lieutenant-Colonel GIELS, 73d Regiment.

II.—**LIEUTENANT GOVERNOR THOMAS DAVEY** arrived in the Colony on the 17th of February 1813, and continued to administer the Government of the Island till the 9th of April, 1817; having administered the Affairs of the Colony 4 years and 51 days.

III.—**LIEUTENANT GOVERNOR WILLIAM SORELL** succeeded Lieutenant Governor DAVEY, and was sworn in as the King's Lieutenant Governor of this Island, on Wednesday, the 9th of April, 1817, and has since continued the Administration thereof—NOW A PERIOD OF NEARLY SEVEN YEARS.

TELEGRAPHIC SIGNALS,

TO BE MADE

FROM MOUNT NELSON TO THE BATTERY.

- No. 1 Vessel in sight in or off Storm Bay Passage
 2 Ditto between Cape Pillar and Bruné Island
 3 Vessel seen is a ship
 4 Ditto a brig
 5 Ditto seen is a schooner
 6 Ditto a sloop
 7 Ditto belongs to the Colony
 8 Government vessel
- Bearings of Vessels seen.*
 9 Bears northerly.
 10 Bears southerly.
 11 Is in sight from Mount Nelson.
- Distance from the Heads.*
 12 One league
 13 Two ditto
 14 Three ditto
 15 Four ditto
 16 Very distant
 17 Distant; weather hazy; cannot denote whether a ship or brig, but looks large
 18 Appears small
 19 Approaching the Heads, or standing in
 20 Got into the River
 21 Approaching Crawfish Point
 22 Vessel coming in has anchored; if after 20 or 21, denotes in the River
 23 Vessel coming in that anchored, is under weigh
 24 Vessel coming in, has got into Storm Bay Passage
 25 The vessel going out, has anchored
 26 The vessel going out which anchored, is now under weigh
 27 Vessel entering the River, has gone into Storm Bay Passage
 28 Has hoisted out a boat

- 29 The boat has left the vessel
 30 A boat, not belonging to the vessel, is gone along-side
 31 The ship seen is gone into Frederick Henry Bay
 32 The brig seen is gone into ditto
 33 The sloop or schooner ditto
 34 The ship seen is gone into Adventure Bay
 35 Ditto brig ditto
 36 Ditto schooner or sloop ditto
 37 The vessel which went out, is returning into Port
 38 The pilot is on board, but has not made the signal
 39 The pilot has made signal where from, but so hazy I cannot see it distinctly
 40 The vessel is from England, with prisoners
 41 Is from England, with merchandize
 42 Has a person of consequence on board
 43 Is from Sydney
 44 From India
 45 Isle of France, Cape of Good Hope, or Brazil
 46 Is a whaler
 47 Is in distress
 48 Has a sickness on board
 49 A King's ship
 50 The same as reported yesterday
 51 The vessel is clear of the River
 52 Is out of sight
 53 The vessel signalized is abreast of Bruné Island
 54 Has a fair wind
 55 Is in distress or dismasted
 56 Requires immediate assistance
 57 The signal man wishes to communicate with an officer from the town
 58 Last signal was a mistake
 59 Annuls last signal
 60 Last question not understood.
- N. B.—A pendant hoisted (where the ball signifying 40 is hoisted) denotes "Yes."—Two ditto, "No." A ball hoisted at the top adds 40 to the number to be made. A pendant at the mast-head is an answer to denote a signal seen at Mount Louis.

MOUNT NELSON.

EXPLANATORY INSTRUCTIONS.

When a signal is made at Mount Louis, it is to be repeated by the telegraphs, for which purpose a copy of the Mount Louis signals is sent.

The telegraphic signals, No. 1, 2, 9, 10, 11, 22, 23, 24, 25, 26, 27, and 37, are altered, in order to correspond in repeating from Mount Louis.

Whenever a vessel is seen at Mount Nelson, No. 11 is to be made.—The flag at Mount Nelson is to be kept hoisted while a vessel is seen at either station, as at present.

In order to enable Mount Nelson to distinguish when two vessels are signaled, or are in sight at once, to which each signal made applies, one ball is to be used when more than one vessel is in sight, as follows:—

With each signal applying to the vessel FIRST reported—ball at the west yard-arm; with each signal applying to the vessel SECOND reported—ball at east yard-arm; with a signal applying to a vessel going out, when another is coming in—ball at centre of yard.—Ball to be lowered with each signal when answered. Mount Louis denotes to which vessel a signal applies, when two are in sight at once, by hoisting the flag with each signal.

Great attention when more than one vessel is in sight, to denote by the ball to which each signal applies.

ADDITIONAL INSTRUCTIONS FOR THE SIGNAL MAN AT MULGRAVE BATTERY.

When more than one vessel is in sight, Mount Nelson will hoist a ball at the yard, with each telegraph signal, to denote to which vessel each signal applies;—

Ball at west yard-arm, denotes the signal to apply to vessel first reported.

Ball at east yard-arm, denotes the signal to apply to vessel second reported.

Ball at centre of yard, denotes the signal to apply to vessel going out.

N. B.—The balls will only be used when more vessels than one are in sight. The signal man at Mulgrave Battery must make his report accordingly, by adding thus, after the No. of the signal:—

1st Reported, or

2d Reported.

SIGNALS

FOR THE SIGNAL POST AT MOUNT LOUIS.

EXPLANATORY INSTRUCTIONS.

The flag at this station is part of the signals, and is *not* to be kept flying while a vessel is in sight.—The flags are of two forms—the one square, to denote a vessel seen in Storm Bay; the other triangular, to denote a vessel in Storm Bay Passage. The flag is to be hauled down as soon as the signal is answered at Mount Nelson, by a pendant at the mast-head.

When more than one vessel is seen, the flag denoting the quarter is to be hoisted with each subsequent signal, in order to shew to which the signal applies.—Each signal to be kept up till answered by a pendant at Mount Nelson.

No. 1 Vessel in sight, in Storm Bay, between Cape Pillar and Bruné Island

2 Vessel in Storm Bay Passage

3 Bears northerly

4 Ditto southerly

5 Approaching the Port, or standing in

6 A ship

7 A brig

8 A schooner

9 A sloop

10 Government vessel

11 Belongs to the Colony

12 A King's ship

13 A whaler

14 Vessel coming in, has got into Storm Bay Passage

15 Pilot has got on board

16 Same as reported before, or yesterday

17 Vessel coming in, has anchored

18 Ditto coming in, which anchored, is under weigh and coming in

19 Ditto going out, has anchored

20 Ditto going out, which anchored, is under weigh and going out

21 Is returning into Port

22 Is out of sight

23 Last signal was a mistake

24 Ditto ditto, annulled

25 From England with prisoners

26 From ditto with merchandize

27 Has a person of consequence on board

28 From India

29 From Isle of France, Cape, or Brazil

30 A boat, not belonging to the vessel, has gone alongside

31 A boat has left the vessel.

☞ *A copper-plate printed Table, shewing the several Positions of the Panes of the Telegraphs, will be published in this Almanack, along with the foregoing Signals, next Year.*

Old Parr's Maxims of Health.

KEEP YOUR FEET warm by EXERCISE, your HEAD cool through TEMPERANCE; never eat till you are hungry, nor drink but when Nature requires it.

BANK HOLIDAYS.

JANUARY	1 —New Year's Day. Anniversary of the opening of the Bank.
	29 —Accession of His Majesty King George the Fourth.
MARCH	1 —St. David's Day.
	17 —St. Patrick's Day.
APRIL	23 —St. George's Day.
	9 —Lieutenant Governor's Sorell's Accession to the Government of Van Diemen's Land.
